

Ville-Veli Einari Saari was born in Kemi, Finland on May 22, 1978. In 1983 he moved to Haparanda (Sweden) and studied system theories, business finance and economics at Uppsala University (M.Sc. in business finance and B.Sc. in economics). Since 2006 he has been working as an entrepreneur connecting Egoistic resource oriented interests with responsible Altruistic visionaries to cater for trustworthy and sustainable business concepts.

Since 2012, he investigates in cooperation with Igor N. Taganov the connection of his concept of Altruistic and Egoistic sociological behaviorism with cosmological processes founding the AEDRP (Altruist-Egoist Doctrine Research Project). As an intuitive physicist he explores the connection of the experienced nature of Time with the behavior types of individuals and social groups, being one of the founders of the Spiral-Time Physics.
